**To whom it may concern:**

I'd like to present myself as a young optimistic individual, I am enthusiastic, self-motivated and an extremely determined person. I am open minded and friendly. I co-operate well with fellow workers/clients. I am competitive and love a challenge. Growing up watching Looney Tunes, Toy Story, Cars and many other animated films and cartoons really got me thinking about how you can actually have a career in creating this kind of art, creating these stories and making these really amazing characters move and have their own personalities. They have inspired me to pursue a career in 3D animation, it also captured my interest in character design. Through hard work and studies, I have learnt multiple 3D Animation and editing software's such as 3DS max, Maya, Match Mover, Adobe After Effects, Mudbox and more.

I want people to think of animation as more than just cartoons that brain wash children, a great animator who used his talents is Angelos Roditakis who created a deeply moving 3D animation entitled "Safe Place" in order to raise awareness on the issue of [domestic violence](#).

Given the correct training and guidance I believe I can do wonders for your company and contribute greatly to its growth.
